

Purpose

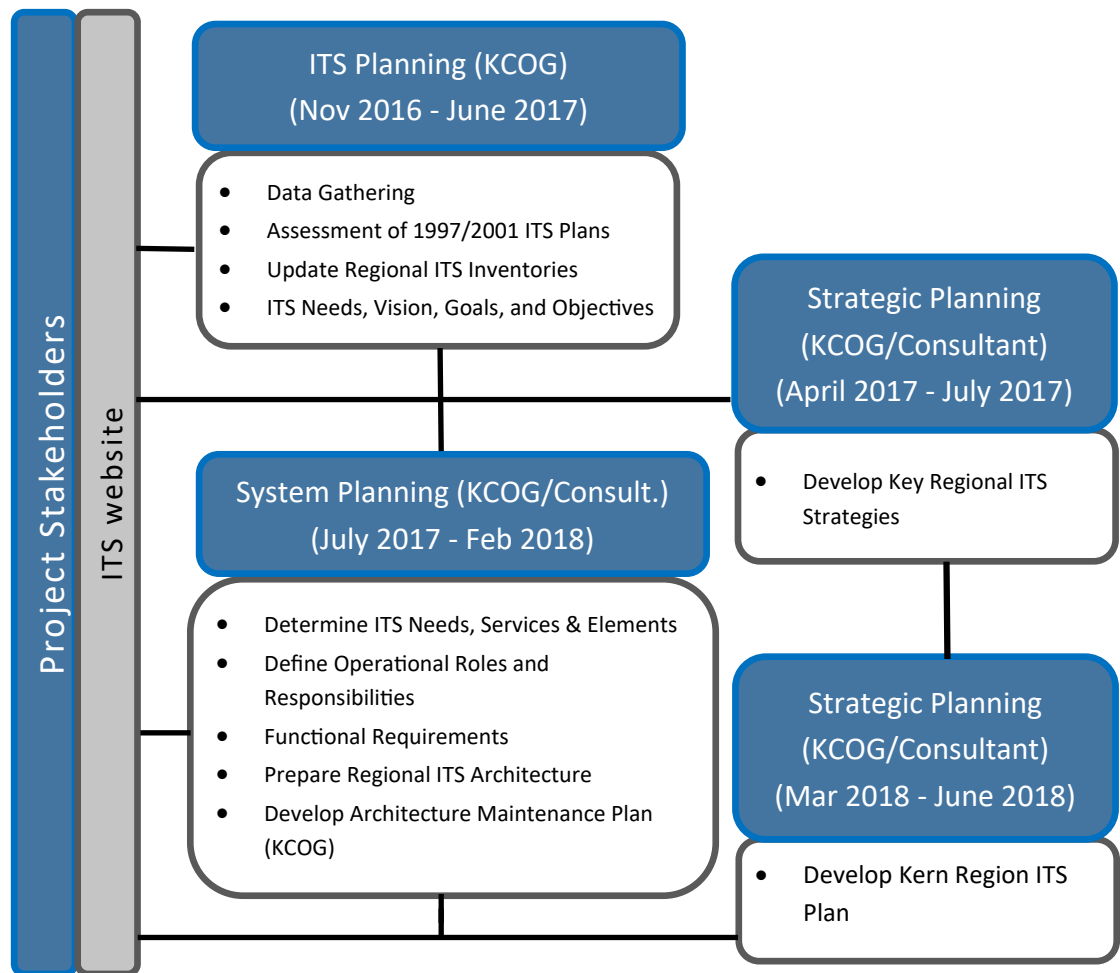

The ITS (Intelligent Transportation Systems) Plan is a critical component in addressing the transportation needs of the region. Kern COG is developing a well needed update to the 1997 Early Deployment Plan for the Kern Region in consideration of the ITS projects being implemented by our partners, the rapid advances in technology in recent years, and to respond to specific recommendations and requirements needed to bring the Kern COG into compliance (23 CFR 940) with current ITS program standards set by the Federal Highway Administration (FHWA) for development of architecture and strategic plans as well as the Federal Transit Administration’s National ITS Architecture Policy on Transit Projects. The ITS Plan will provide a vision for ITS, outline a program of low, medium and high priority projects, identify a funding strategy, and establish a plan for managing, integrating, operating, and maintaining the ITS elements in the region that are to be implemented over a 20-year horizon.

Development Schedule

The ITS Plan will be developed over a 20-month schedule.

Deliverable #1 - Project Plan provides a strategy for stakeholder outreach and detailed master schedule.

As tasks are completed, final deliverables will be posted to the Kern COG website.
