

Server RFP Questions & Answers

1. Is there a specific form factor? Tower – Rack (1U, 2U, etc.)
Rack – shorter is preferred, but not required
2. How much total storage is Needed for each server?
Only enough for Hyper-V OS install. All other data will be on a SAN.
3. Do you require RAID (What RAID Level)
RAID 1 would be an optional add-on
4. What type of drives do you need for storage (SATA, SAS, NVMe)
NVMe is preferred, but not required
5. Do you need the operating system software (e.g. Windows Server: Standard or Datacenter).
No OS is required
6. Will you need additional Server CAL's?
No Server CALs are required
7. Other Software needed?
No other software is required
8. Do you have a general use case for these servers, what will you be doing with them?
They will be used as Hyper-V hosts
9. Can you please help advise which drives you want to install inside this server?
NVMe is preferred, but not required with RAID 1 would be an optional add-on
